

## PITRAM Consultant

### Perth

Micromine Pty Ltd develops software products and provides consulting services to the mining and exploration industry. It markets those products worldwide through branch offices at a number of overseas locations. Our company of more than 150 employees has a rich 22-year tradition in software development. We develop several software products utilising various technologies.

We are seeking an experienced IT professional to configure, deploy and support software solutions based on Micromine's software suite.

#### Primary Responsibilities

Include but are not limited to:

- Design and build software solutions to address client needs
- Development of implementation work plans
- Production of high-level project documentation
- Deployment and support of software
- Training of end users
- Identification and provision of IT services to existing clients

You will have well developed team work and interpersonal skills, with a proven ability to communicate effectively with various teams within the organisation. You will be able and willing to work independently in remote locations both in Australia and overseas with minimal supervision. You will also have a desire to provide a high level of customer service to Micromine's existing clients.

Regular travel to client sites, both within Australia and overseas, will be required as part this position.

The preferred candidate will have a tertiary qualification based on information services, technology or communications disciplines or comparable industry experience. Experience within, or supporting, the mining industry will be highly regarded.

You must be an Australian citizenship or have current Permanent Residency status to apply for this position.

#### For further information

If you would like further information or a confidential discussion regarding this position please contact HR on (08) 9423 9000.
