

Software Quality Team Leader

Perth

Micromine is seeking an experienced quality assurance professional to lead our specialised software quality team. As the Software Quality Team Leader, your role will include the design, implementation and maintenance of Micromine's test processes with the aim of achieving high software quality standards

Primary Responsibilities

- Management of Micromine's software test team and the test environment
- Design of test strategies and delivery of test processes for Micromine's mining software solutions
- Development and implementation of test plans
- Production of high-level test documentation
- Management of testing tasks and production of test reports
- Overview of test case preparation and execution
- Design and implementation of automated test frameworks
- Defect management including issue resolution and escalation

You will have well developed team work and interpersonal skills, with a proven ability to operate independently and communicate effectively with various teams within the organisation. You will be able to demonstrate a proven track record of managing teams, with experience in managing, leading and motivating software test teams.
