

9 April 2009

Micromine awarded at the 2009 iAwards

Micromine, the leading provider of software solutions and services to the exploration and mining industry, announced it was awarded a certificate of Merit at the prestigious iAwards. The awards ceremony was held at the Woodside building in Perth on Tuesday 7th April 2009. Micromine was awarded for its PITRAM solution which was recognised in the MAAT Solutions Industrial Application category. The category showcases software or hardware products that deliver improved outcomes in industrial processes or activity.

Administered by the Australian Information Industry Association, the iAwards are recognised as Australia's leading Information Communication Technology (ICT) Industry awards. The awards are a celebration of Australian made innovative technology solutions. The ceremony was attended by industry leaders within the information technology and business communities.

PITRAM is an innovative mine production management and control system that manages and controls all functions within a mine site. This includes mine development, production, equipment maintenance and surveying. PITRAM was awarded for its proven outcomes when installed on a mine site. By managing and controlling all mine site functions, continuous improvement programs can be implemented to lower costs, raise production and increase the Return on Investment (ROI).

Micromine's Chief Executive Officer (CEO), Peter Rossdeutscher, commented that "We are honoured to receive this technology award. Micromine leads the way in mining and exploration systems by enhancing the most innovative and commercially proven systems available.

Micromine re-invests 30 per cent of its annual revenue into the ongoing research and development of its PITRAM, GBIS, MICROMINE and DOME solutions. Our success at the iAwards showcases our commitment to innovative technology and how it continues to add more value to our clients operations".

About Micromine

Micromine is a global leader in providing innovative software solutions and services to the mining and exploration industry. From capturing, managing, visualising and understanding data, to controlling and reporting on mine production, Micromine has a solution for all operations.

Micromine has offices in 13 countries, including 12 that are fully owned, operated and managed by an active Board of Directors. Its software is available in English, Mandarin, Russian and Spanish.
